

BRUCELLOSIS

CHI Formulary Development Project

Treatment algorithm-January 2024

Supporting treatment algorithms for
the clinical management of
Brucellosis

Figures 1,2 and 3 outline a comprehensive treatment algorithm on the **management of Brucellosis**, aimed at addressing the different antibiotic combinations after thorough review of medical and economic evidence by CHI committees.

For further evidence, please refer to CHI **Brucellosis** full report. You can stay updated on the upcoming changes to our formulary by visiting our website at <https://chi.gov.sa/AboutCCHI/CCHIprograms/Pages/IDF.aspx>

Our treatment algorithm offers a robust framework for enhancing patient care and optimizing treatment outcomes across a range of treatment options, holding great promise for improving healthcare delivery.
